Vector Control in Humanitarian Emergencies
MISSION STATEMENT

To reduce human suffering and death from vector-borne diseases in complex operating environments by:

a) improving delivery, uptake, integration and evaluation of existing vector surveillance and control tools;

b) facilitating the development of an evidence-base and uptake of supplementary and emerging tools.
Purpose:

*facilitate introductions, stimulate discussions to*

- improve service delivery with existing tools;

- developing evidence-based for supplementary and emerging tools.

Tomorrow will be plenary discussion of the draft 2018 workplan; this hour will be an opportunity to provide a framework and introduce interested parties to each other for further individual discussions and input to that workplan.
